## Investment Strategy

Since establishment in 2004, Vantage has developed and managed a Fund of Funds investment strategy focused exclusively on small to mid-market Growth Private Equity. This segment of Private Equity focuses on investments into profitable businesses with proven products and services.

These businesses typically have a strong market position and generate strong cash flows allowing Vantage's funds to generate strong consistent returns to investors, while significantly reducing the risk of a loss within the portfolio.

A key factor in Vantage's investment strategy is risk minimization. This is obtained by diversification of underlying investments across a range of parameters including; fund manager, geographic region and industry sector.

VPEG5 will develop a diversified portfolio of underlying investments similar to Vantage's existing Private Equity funds, which have an emphasis on growth industry sectors including the Healthcare, Consumer, Industrials, Information Technology and Agricultural Products sectors.
